

PHB Contractors Henfield Ltd were contracted this year to create 13,000m² of new all-weather parking at Leonardslee Gardens. The project took several months to complete and involved importing almost 10,000 tonnes of specialist aggregates to create the sustainably drained surfacing. PHB were delighted to be able to undertake a project of this scale for such a prestigious local venue, significantly increasing their capacity for visitors during peak event times. PHB are proud to be a sponsor of the Leonardslee Illuminations 2020.

PHB are a local company with over thirty years' experience in plant hire, groundworks, large scale landscaping, and lakes and ponds. More recently, after more than a decade in the electric vehicle charging industry, the company is enjoying a rapidly increasing market share with their EV civils installations.
